PROFESSIONAL SUMMARY

Mid-Level QA Automation Engineer with 3+ years of experience in ERP and POS system quality assurance. Proven expertise in Test Planning, Test Strategy, Manual & Automation Testing using Selenium Python, and API Testing via Postman and Newman. Managed 1025+ issues across frontend, backend, Web API, and business logic layers within Agile/Scrum environments. Skilled in SQL validation using SQL Server and PostgreSQL, performance testing with JMeter and Locust, mobile application testing across 5 Android apps, and full SDLC/STLC lifecycle management.

TECHNICAL SKILLS

Testing & QA: Manual Testing (Smoke, Sanity, Regression, Integration, Functional), Non-Functional Testing, UAT Support, Root Cause Analysis, Defect Lifecycle Management, Test Planning & Design, Business Workflow Validation, Agile/Scrum, SDLC/STLC

API Testing: REST, GRPC, SOAP | Postman, Newman, Swagger, Insomnia

Automation Tools: Selenium WebDriver, Test Complete, Katalon Studio, Katalon Recorder, TestNG, JUnit, CI/CD Pipelines

Performance Testing: JMeter, Locust

Security Testing: OWASP ZAP (DAST) — Spider & Active Scans, Passive Analysis, SQL Injection, XSS, Security Headers Validation

Mobile Testing: Android, Google Play, Functional Testing, Regression Testing, Usability Testing, API Integration, Offline POS, Data Sync | Skey Mobile, SKey POS, Cashier Me, Skey ESS, Ithnain

Version Control & IDE: Git, GitHub, GitLab, VS Code, Cursor

Databases: Microsoft SQL Server, PostgreSQL, MongoDB | SSMS, DBeaver, PGAdmin, Stimulsoft Reports

ERP & POS Systems: FERP, Motkamel ERP, Skey ERP, POS Systems | Modules: Finance, HR, Inventory, and Accounting

Programming Languages: Python, Java, C#

PROFESSIONAL EXPERIENCE

QA Automation Engineer – Team Leader | Ultimate Solutions

May 2024 – Present

- Led QA for 8+ core ERP modules (Finance, HR, Inventory, Accounting, Purchase, Fixed Assets System, Manufacturing Resource Planning, Customer Relations Management, Hospital Management) covering Manual and Automation Testing.
- Designed and maintained comprehensive test cases; managed 1025+ issues in frontend, backend, API, and business logic layers using GitLab and Jira.
- Developed 15+ Selenium Python automation scripts for complex ERP workflows (Purchase Invoice screens), significantly reducing manual regression effort.

- Conducted API testing for 200+ endpoints using Postman and Newman; validated REST, GRPC, and SOAP responses with SQL Server and PostgreSQL data integrity checks.
- Executed Performance Testing with Locust to identify bottlenecks; performed DAST security scanning with OWASP ZAP (spider, active, and passive scans) plus SQL Injection and XSS validation.
- Tested 5 mobile applications (Skey Mobile, SKey POS, Cashier Me, Skey ESS, and Ithnain) for functionality, usability, and API integration.
- Collaborated with developers and Business Analysts in Agile/Scrum sprints for regression and pre-release validation.
- Validated and customized ERP reports using Stimulsoft Reports; performed end-to-end workflow accuracy verification.
- Reduced manual regression effort by 70%.

KEY PROJECTS

Key ERP System Automation | github.com/ismail0ibrahim/automation_skey

Led QA for 8+ core modules; managed 1025+ defects; developed 15+ Selenium Python automation scripts and tested 200+ API endpoints.

FERP ERP System

Executed full regression and integration testing for Finance, HR, and Inventory modules within agile sprints.

Motkamel ERP System

Performed regression, integration, and API testing for core ERP modules including Finance and HR.

Security Testing - OWASP ZAP

DAST security scanning of ERP web modules and APIs using OWASP ZAP: spider and active scans, passive analysis, and detection of SQL Injection, XSS, and missing security headers.

MOBILE APPLICATIONS

Skey Mobile | Android | Published on Google Play

Business management app for sales, invoicing, payments, and expenses. Led functional, regression, and API integration testing across releases.

SKey POS | Android | Published on Google Play

Offline-first point-of-sale app with sessions, returns, and cash clearance. Covered end-to-end POS flows, data sync, and usability testing.

Cashier Me | Android | Published on Google Play

Offline POS for restaurants, cafes, and retail stores with cloud sync and Bluetooth printing. Validated sales flows, reports, and printing.

Skey ESS | Android | Published on Google Play

Employee self-service app for HR requests and payslips. Completed the full QA cycle covering functional, regression, and API testing.

Ithnain | Android | Google Play In Review

Diabetes management app helping patients track their health. Completed functional and usability testing prior to store submission.

CERTIFICATIONS & TRAINING

- ISTQB Foundation Level – In Progress
- Selenium WebDriver with Python – Practical experience (15+ scripts in production use)

EDUCATION

Bachelor of Computer Science | Thebes Academy, Cairo, Egypt

Sep 2018 – Jun 2022 | GPA: 3.0 / 4.0
