PROFESSIONAL SUMMARY

Mid-Level QA Automation Engineer with 2+ years of experience in ERP and POS system quality assurance. Proven expertise in Test Planning, Test Strategy, Manual & Automation Testing using Selenium Python, and API Testing via Postman and Newman. Managed 700+ issues across frontend, backend, Web API, and business logic layers within Agile/Scrum environments. Skilled in SQL validation using SQL Server and PostgreSQL, performance testing with JMeter and Locust, and full SDLC/STLC lifecycle management.

TECHNICAL SKILLS

Testing & QA: Manual Testing (Smoke, Sanity, Regression, Integration, Functional), Non-Functional Testing, UAT Support, Root Cause Analysis, Defect Lifecycle Management, Test Planning & Design, Business Workflow Validation, Agile/Scrum, SDLC/STLC

API Testing: REST, GRPC, SOAP | Postman, Newman, Swagger, Insomnia

Automation Tools: Selenium WebDriver, Test Complete, Katalon Studio, Katalon Recorder, TestNG, JUnit, CI/CD Pipelines

Performance Testing: JMeter, Locust

Version Control & IDE: Git, GitHub, GitLab, VS Code, Cursor

Databases: Microsoft SQL Server, PostgreSQL, MongoDB | SSMS, DBeaver, PGAdmin, Stimulsoft Reports

ERP & POS Systems: FERP, Motkamel ERP, Skey ERP, POS Systems | Modules: Finance, HR, Inventory, and Accounting

Programming language: Python, Java, C#

PROFESSIONAL EXPERIENCE

QA Automation Engineer – Team Leader | Ultimate Solutions *May 2024 – Present*

- Led QA for 5+ core ERP modules (Finance, HR, Inventory, Accounting, Purchase) covering Manual and Automation Testing.
- **700+ issues** Designed and maintained comprehensive test cases Managed In frontend, backend, API, and business logic layers using GitLab and Jira.
- **15+ Selenium Python automation scripts** Developed For complex ERP workflows (Purchase Invoice screens), significantly reducing manual regression effort.
- **100+ endpoints** Conducted API testing for Using Postman and Newman; validated REST, GRPC, and SOAP responses with SQL Server and PostgreSQL data integrity checks.
- Executed Performance Testing with Locust to identify bottlenecks; conducted SQL Injection security validation.
- Tested 3 mobile applications (Skey Mobile, Skey POS, and Cashier Me) for functionality, usability, and API integration.
- Collaborated with developers and Business Analysts in Agile/Scrum sprints for regression and pre-release validation.
- Validated and customized ERP reports using Stimulsoft Reports; performed end-to-end workflow accuracy verification.

- Adept at analyzing business requirements, verifying database transactions, ensuring end to-end workflow accuracy.
- Reduced manual regression effort by 70%

KEY PROJECTS

Skey ERP System Automation | github.com/ismailOibrahim/automation_skey

- Led QA for 5+ core modules; managed 700+ defects; developed 15+ Selenium Python automation scripts and tested 100+ API endpoints.

FERP ERP System

- Executed full regression and integration testing for Finance, HR, and Inventory modules within agile sprints.

Motkamel ERP System

- Performed regression, integration, and API testing for core ERP modules including Finance and HR.

POS & Mobile Applications

- Tested POS system functionalities and 3 mobile apps (Skey Mobile, Skey POS, and Cashier Me) for functionality, usability, and API integration.

CERTIFICATIONS & TRAINING

- ISTQB Foundation Level – In Progress
- Selenium WebDriver with Python – Practical experience (15+ scripts in production use)

EDUCATION

Bachelor of Computer Science | Thebes Academy, Cairo, Egypt *Sep 2018 – Jun 2022* | GPA: 3.0 / 4.0
